Login

1.1 - Login Screen & its functions

McDonald's Meal Generator

McDonald's Meal Generator

VERSION 0.0.1

Username

Password

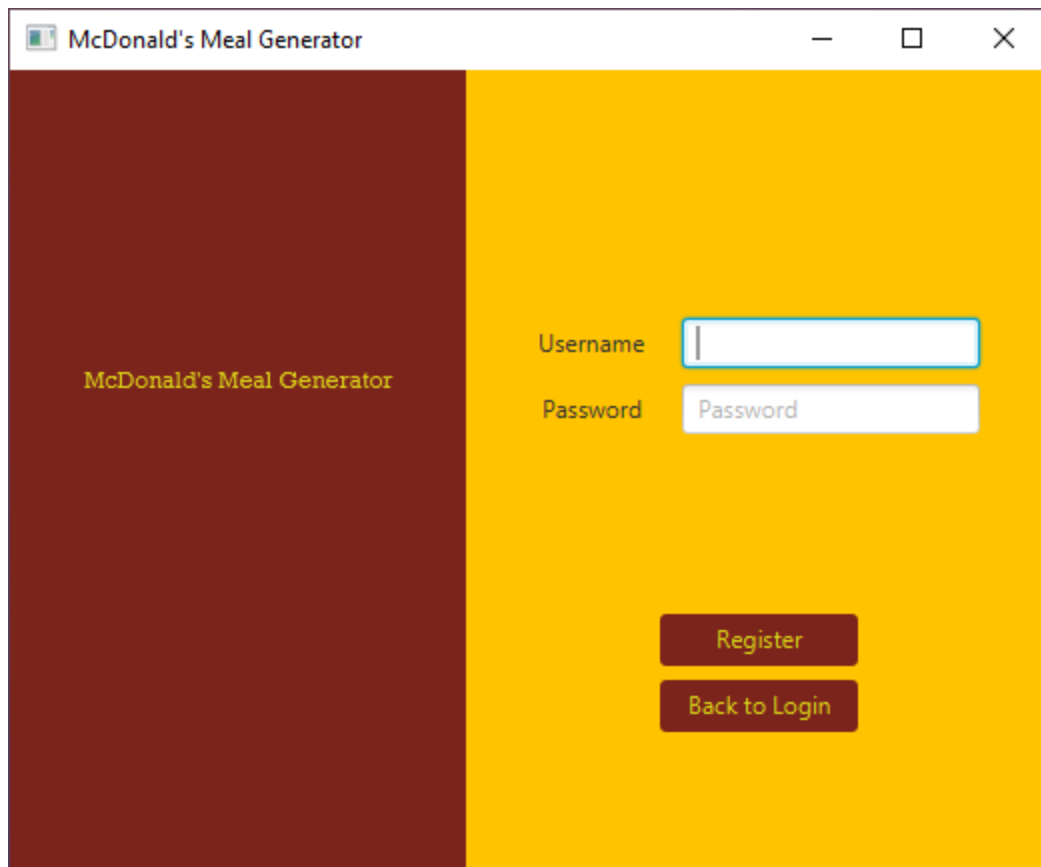

Login

Register

This section of the program allows you to login using your previously made credentials. Once logged in, you can access the main menu. Simply input your credentials into the username and password text box, and then click the login button. If you do not have previously made credentials, simply click register.

Register

2.1 - Register Screen & its functions

The screenshot shows a web application window titled "McDonald's Meal Generator". The window is split into two main sections. The left section has a dark red background and contains the text "McDonald's Meal Generator" in yellow. The right section has a yellow background and contains a registration form. The form includes two input fields: "Username" and "Password". Below the "Password" field, there are two buttons: "Register" and "Back to Login".

McDonald's Meal Generator

Username

Password

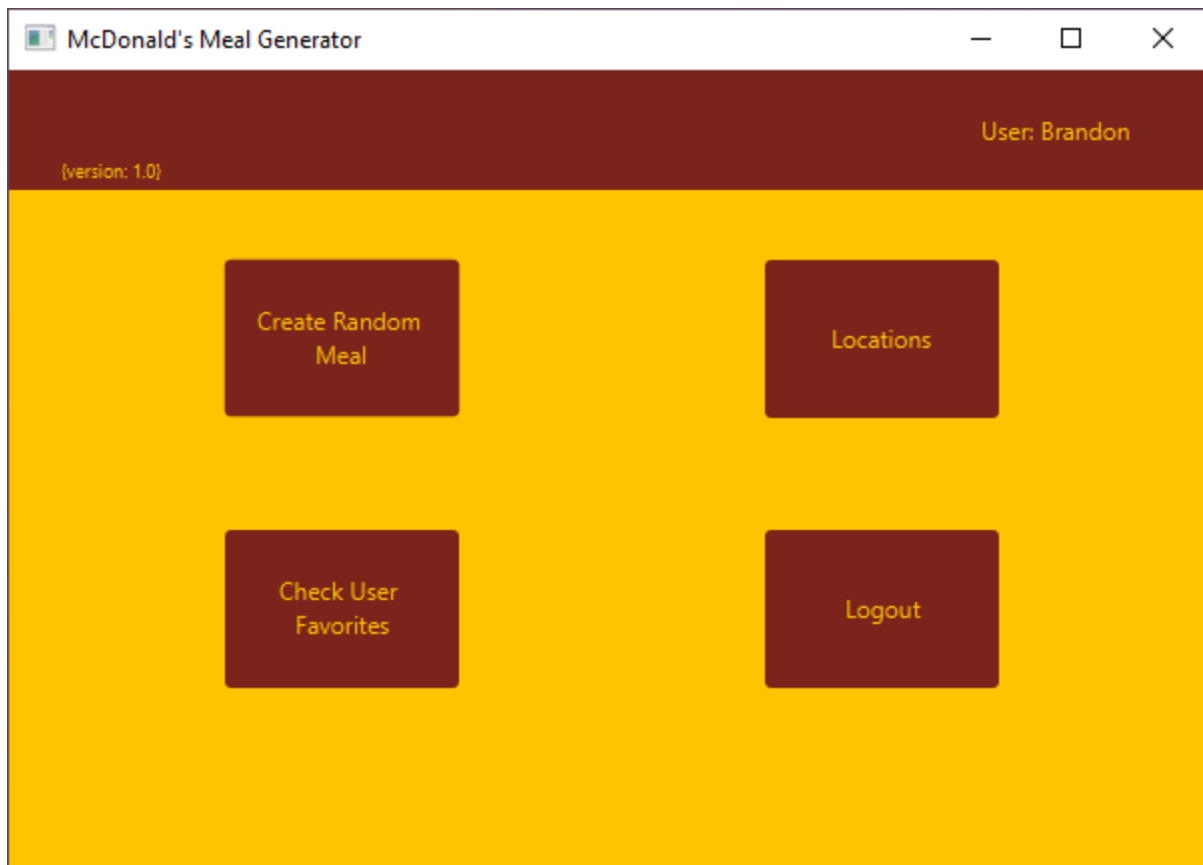

Register

Back to Login

This section of the program allows you to create a user login by specifying a unique username and password combination. To access this section, simply click the register button, and to return to the login screen, hit the 'Back to Login' button.

Main Menu

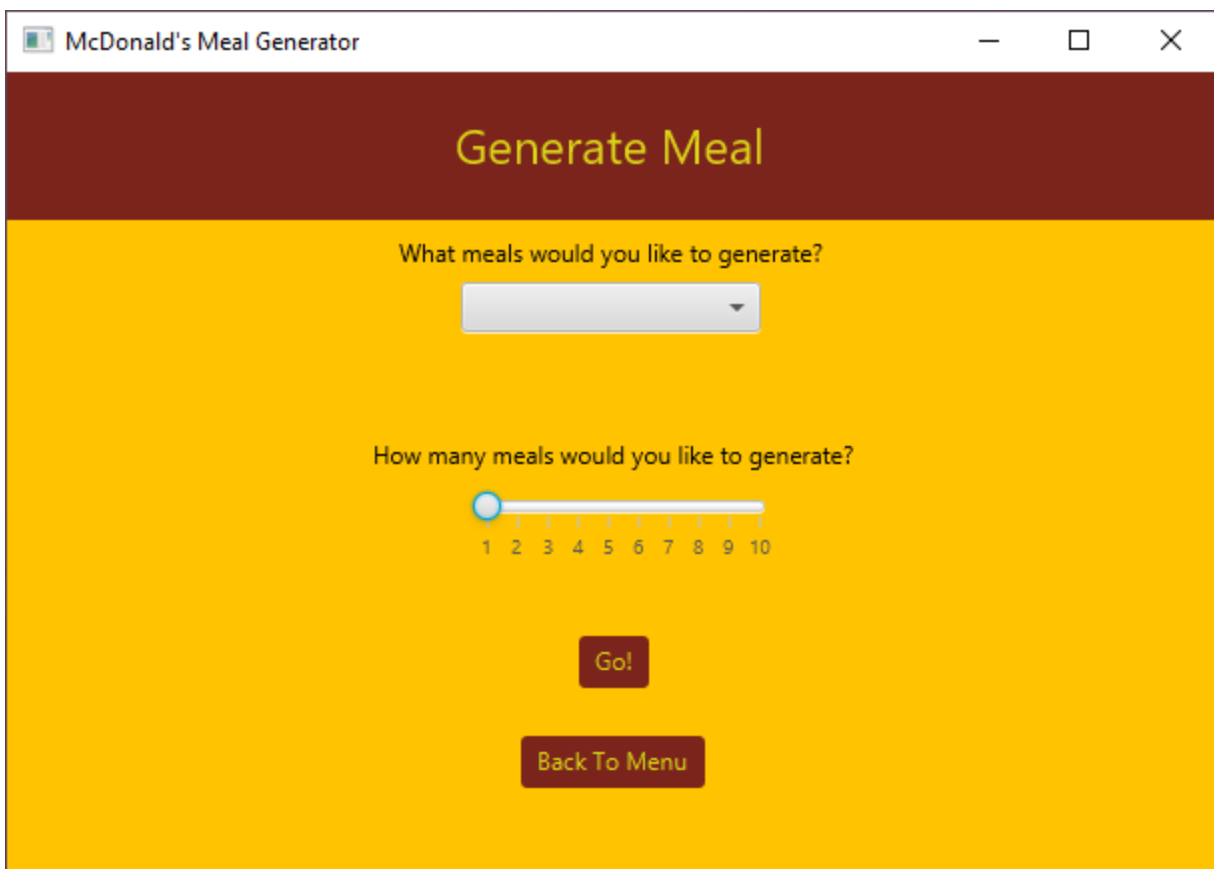

3.1 - Main Menu

This section of the program allows you to access the core functions of the program, create random meals, access locations, and check user favorites. You can also log out of the program from here.

Create Random Meal

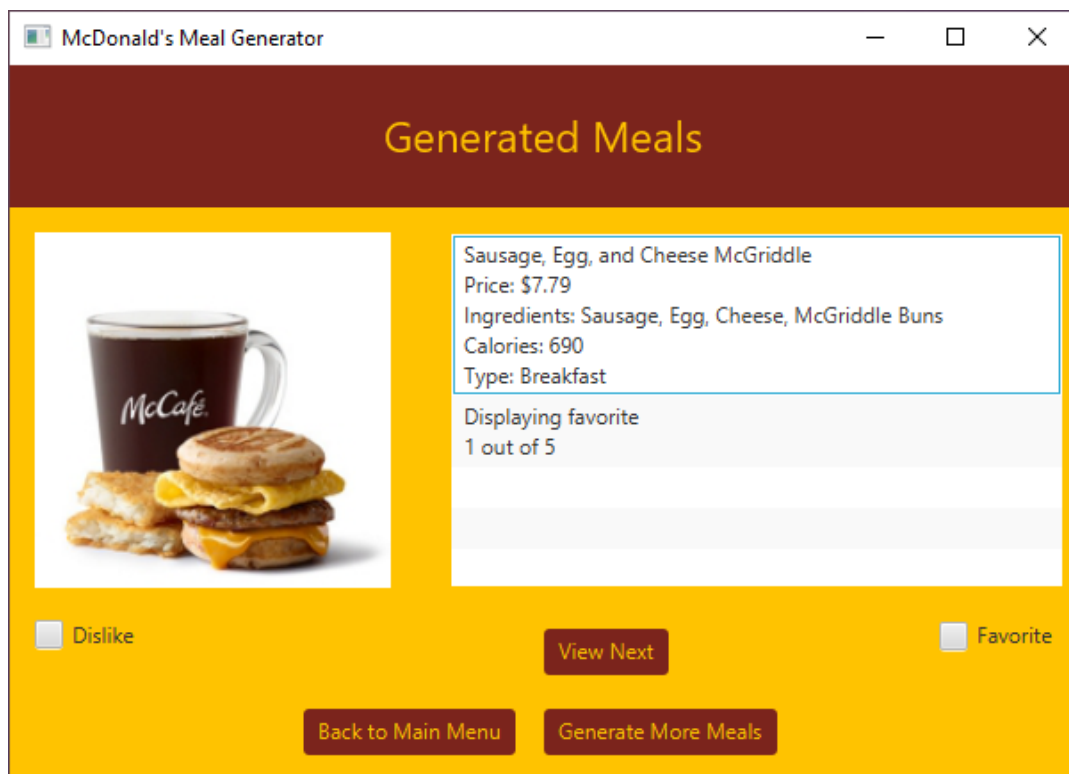

4.1 - Generate Meal Screen

The screenshot shows a web browser window titled "McDonald's Meal Generator". The page has a dark red header with the text "Generate Meal" in yellow. Below the header, on a yellow background, is the question "What meals would you like to generate?" followed by a white dropdown menu. Below that is the question "How many meals would you like to generate?" followed by a horizontal slider with a blue handle and a scale from 1 to 10. At the bottom, there are two buttons: a dark red "Go!" button and a dark red "Back To Menu" button.

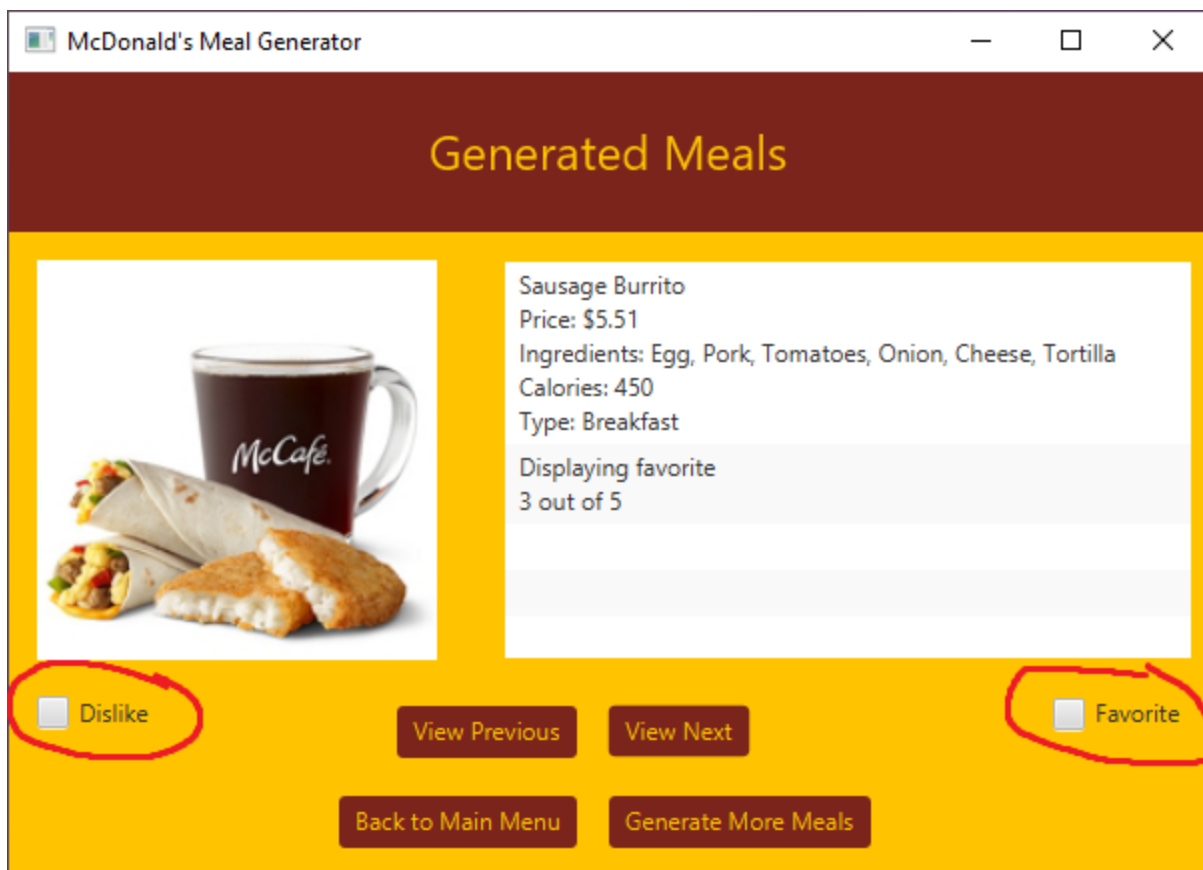

This section allows you to generate up to 10 meals. You can choose between breakfast and lunch using the dropdown menu and you can select the number of meals you wish to generate by dragging the slider to the desired number of meals. Once the desired specifications are achieved, simply hit 'Go!' to generate meals. You may also return to the menu by clicking 'Back To Menu'

4.2 - Generated Meal Result Screen

This screen allows you to see the meals information and name. The information tells the user the price of the meal, the total number of calories within the meal, the ingredients in the meal and the type of meal (breakfast or lunch). You can also either hit the 'Generate More Meals' button to return to the previous screen and generate more meals, or you can hit 'Back to Main Menu' to return to the main menu.

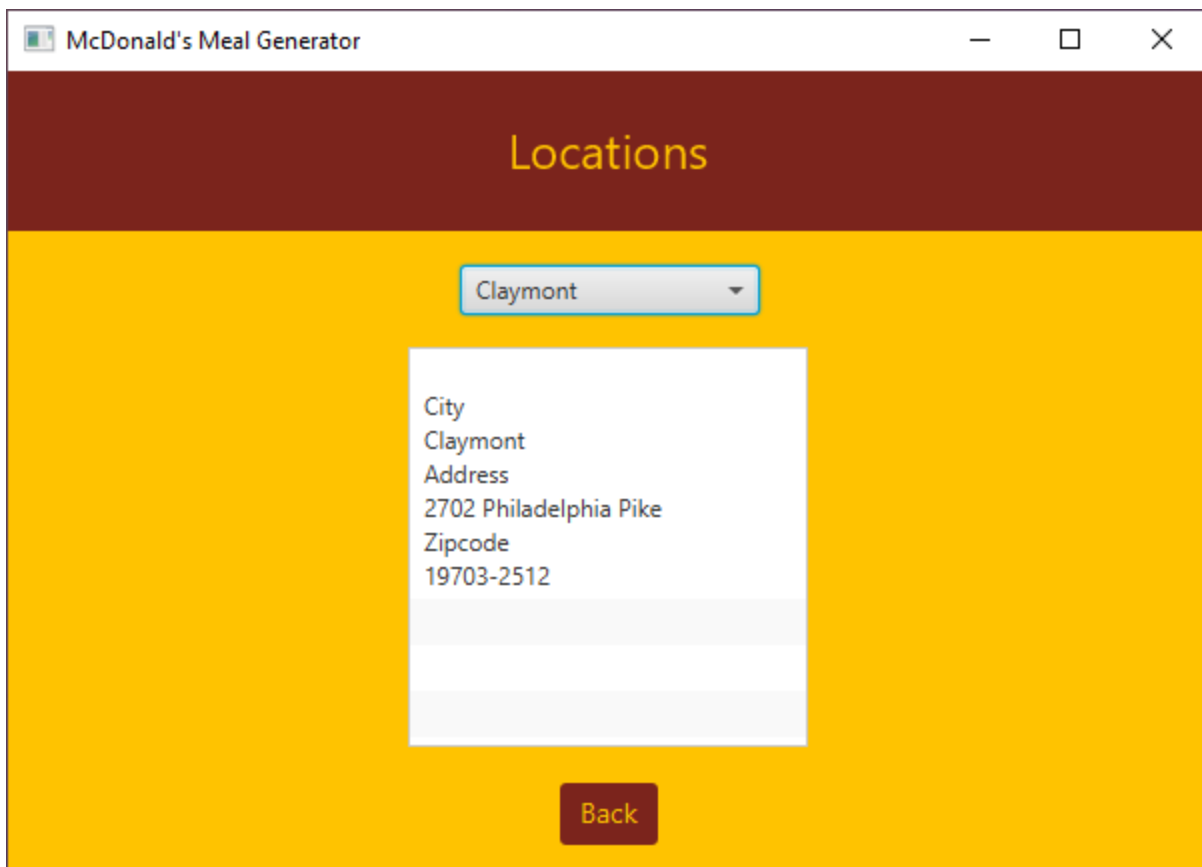

4.3 - Favorite and Dislike controls

These check boxes allow you to either favorite or dislike a generated meal. Simply click on the favorite or dislike box to respectfully favorite or dislike the meal. You can check which meals have been favorited from the 'Check User Favorites' section of the program on the main menu.

Locations

5.1 - Location Drop Down Menu

McDonald's Meal Generator

Locations

Claymont

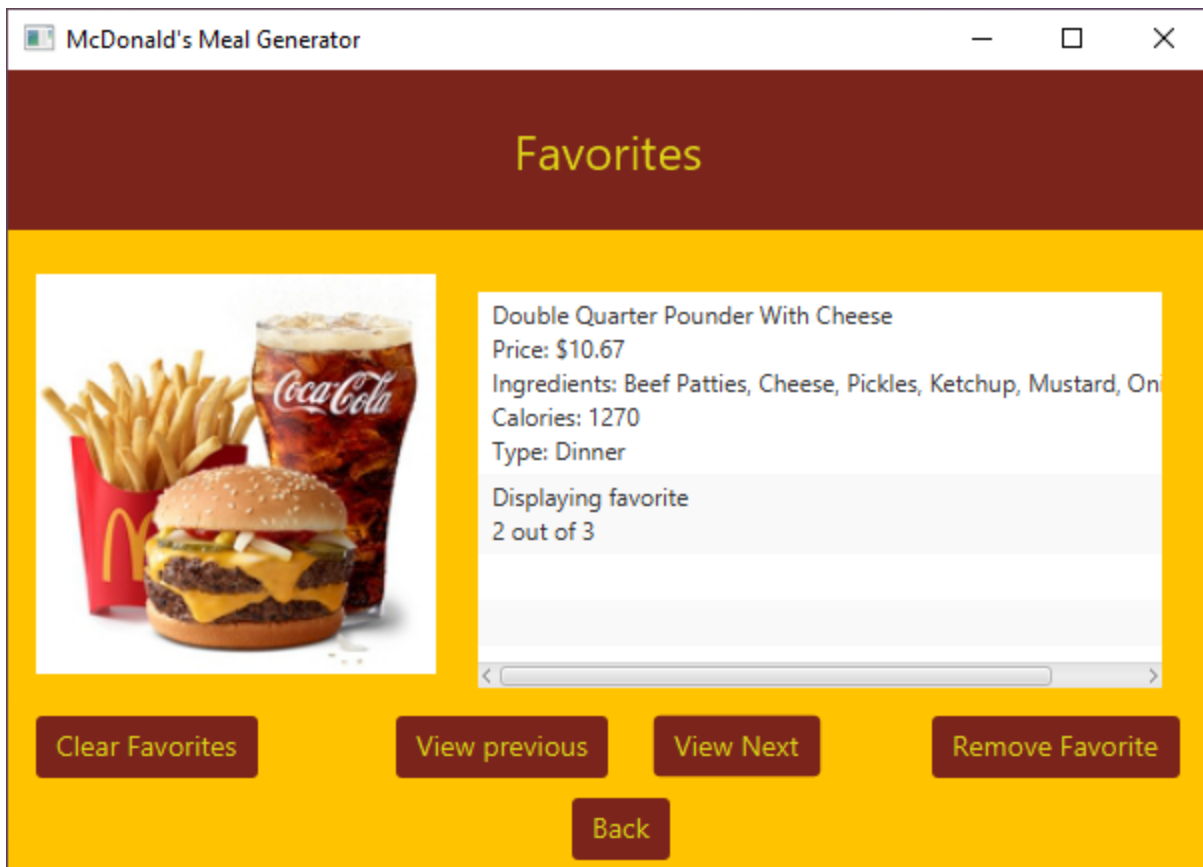

City
Claymont
Address
2702 Philadelphia Pike
Zipcode
19703-2512

Back

This menu will allow the user to select any location where there is a McDonalds and then display the location's city, address and zip code. To return to the main menu, click on the back button.

Check User Favorites

6.1 - Favorites Screen

This screen displays meals that the user favorited in the meal generator. Here, they can view them whenever they want. This screen displays all the same information as the meal generator results screen, and also shows the user how many meals they have favorited. The user can use the view buttons to see either the previously favorite meal or the next favorite meal, in chronological order. Click the 'Back' button to return to the main menu.

6.2 - Clear Favorites

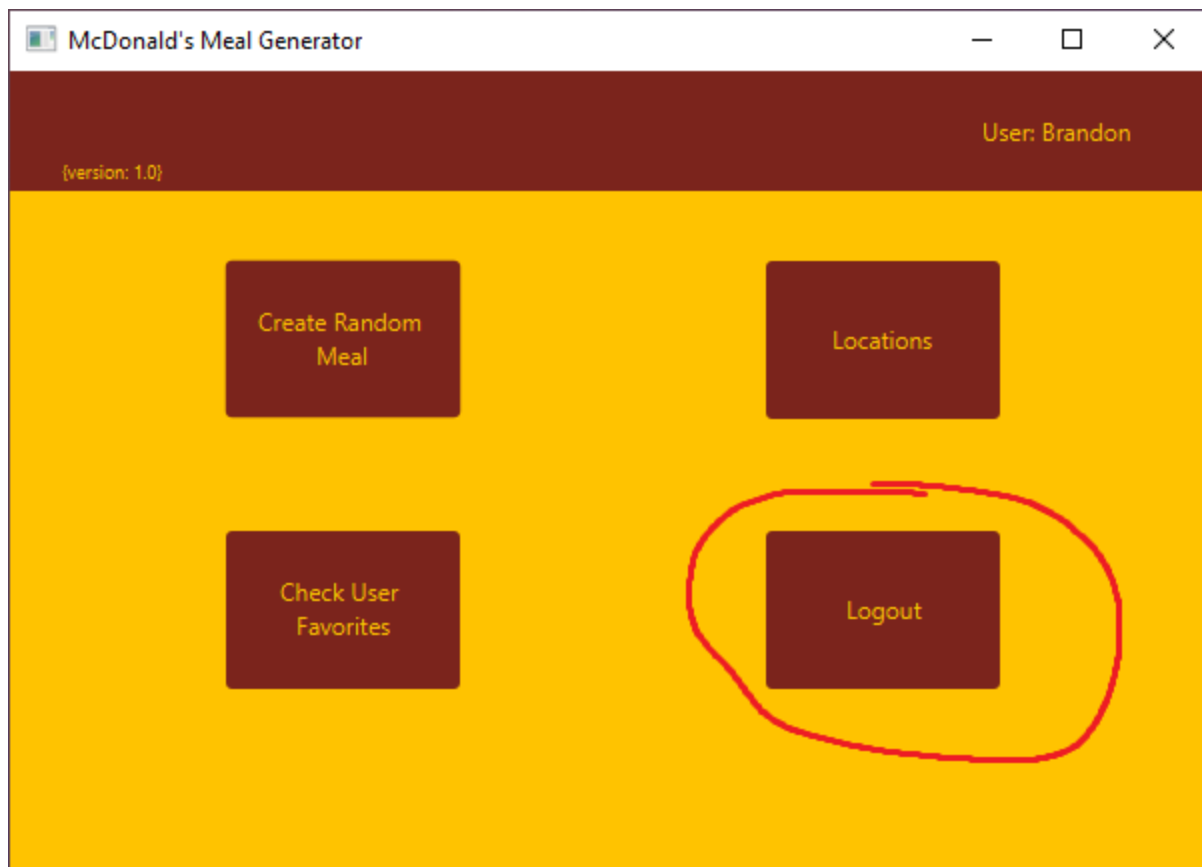

This button will remove all of the users favorites.

6.3 Remove Favorite

This button will remove the favorite currently displaying on the screen from the list of user favorites.

Logout

7.1 - Logout

To log out of the program, simply click the 'Logout' button on the main menu. This will allow the next user to access all of their account's favorites, while preventing the current users data to be accessed.
